The screenshot shows a web-based IDE interface for a project named "LogiHaul-Notification-Processor". The left sidebar contains an "EXPLORER" view showing the file structure with "lambda_function.py" selected. Below it is a "DEPLOY" section with buttons for "Deploy (Ctrl+Shift+U)" and "Test (Ctrl+Shift+I)". The main editor area displays the code for "lambda_function.py". The code imports "json", "boto3", and "os", creates an "sns" client, and defines a "lambda_handler" function. A red arrow points to a syntax error on line 17: `Hello {order['customer_name']},`. The error message in the console above indicates a `KeyError: 'customer_name'`. The code continues with a thank you message and order details.

```
1 import json
2 import boto3
3 import os
4
5 sns = boto3.client("sns")
6
7 TOPIC_ARN = os.environ["TOPIC_ARN"]
8
9
10 def lambda_handler(event, context):
11
12     for record in event["Records"]:
13
14         order = json.loads(record["body"])
15
16         message = f"""
17 Hello {order['customer_name']},
18
19 Thank you for your order with LogiHaul. We have successfully received your delivery request and our team is
